Dear Customer,

19th November 2018

As you are aware, the UK will leave the EU on March 29, 2019.

As one of the market leaders in the UK for the supply of Stainless, Aluminium and Copper Alloys, we take our responsibility to maintain a seamless continuity of supply to our customers very seriously.

Our "Brexit Committee", made up of Senior Management, have been holding regular meetings for 12 months with Government, Civil Servants, Trade Organisations and Port Authorities to establish the impact of a range of potential scenarios on the availability of metals and plastics.

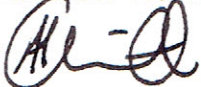

Our purchasing teams have been formulating contingency plans with all of our key suppliers across our entire supply chain and we are confident we are well positioned to minimise any disruption.

We have two world class Central Stock facilities in the West Midlands that give us over 450,000 sq. ft. of warehouse space, which together with the support of our strategic partners, will enable us to increase volumes we can hold in stock significantly over a very short period, should we be required to do so. We feel this will more than compensate for any logistical disruption that may occur.

The central facility in Wednesbury is now gearing up to ensure that the availability of metals are not interrupted and we would be happy to invite you to visit our sites so you can judge for yourself the range and depth of standard stock we carry.

Furthermore, if you feel that we can help you in any other way to secure the consistency of supply of bespoke metals that you purchase and are critical to your business; please do not hesitate to contact your account manager at Aalco.
